

Telemetry Data Sheet

Dataset: APO Logs & Web Vitals

Version: 1.0

Last Updated: October 2025

Data Sources

- apo_logs: APO calculation telemetry (latency, tokens, model config)
- web_vitals: Client-side performance metrics (LCP, FCP, INP)
- llm_logs: General LLM request/response logging

Retention & Privacy

- Logs retained for 90 days; aggregated metrics retained indefinitely
- User IDs anonymized in public reports; no PII in telemetry
- RLS enforced; users can only view their own logs

Purpose

- Monitor performance, detect anomalies, track model usage and costs
- Inform calibration and validation studies
